Glenn-- thanks for doing the cleanup on the file-- I did look at it, but the comments were getting so thick I had a hard time evaluating who was saying what. I think the outline needs an "owner" who can accept changes, etc. (and I guess, log comments or ongoing issues in the notes file, if that's the idea?).

Ex. 5 - Deliberative

Not sure what we are doing next or who's doing what...

Since there were no more comments after Bob's, I took another stab at the outline for the mining scenario.

I also started a notes page where we can discuss how we are going to proceed.

Please, everyone add to or comment on the notes and outline.

We need to start making some progress on this.
